Report of Board of Health.

TO THE SELECTMEN AND CITIZENS OF WOLFEBOROUGH:

Up to November 12th., the day I resigned the office as member of the Board of Health, five cases of typhoid fever, one of which was fatal; one of scarlet fever; eight of diphtheria, one fatal; six of measles; and one of small-pox have been reported to the Board of Health. By the kindness of the Town Clerk I am able to report the births and deaths for the full year 1903.

Death from birth to 10 years old,	1 male
From 10 to 20 years old,	2 females 1 "
From 20 to 35 years old,	1 "
From 30 to 40 years old,	" "
From 40 to 50 years old,	1 " 1 "
From 50 to 60 years old,	" 2 "
From 60 to 70 years old,	3 " "
From 70 to 80 years old,	6 " 3 "
From 80 to 90 years old,	5 " 3 "
From 90 to 100 years old,	2 " 1 "

The average age of males sixty-three years and a fraction; females seventy years. Included in the above deaths are three summer tourists, while in fact three of our citizens passed away in other towns and state. The death rate per thousand is fourteen and one-eighth, which, by comparison, is below the average of the state. The whole number of living births are, females seventeen, males twenty-two, ten of which were born in July. I have made the monthly reports to the State Board of Health promptly. I also made in the month of September inspection of the water shed surrounding our public water supply, which I found in good condition. I recommend the removal of every bit of wood below high water mark in Beach Pond that is possible to obtain.

In the thirteen years that I served you as Board of Health under the old law and as member of the Board of Health under the new law, it has been my purpose to be prompt in the discharge of my duty and in no one case to neglect the sick or afflicted.

I should be remiss in duty did I omit to thank the other members of the Board, the physicians of the town and all those who have rendered me assistance, for their cordial support.

Very respectfully submitted,

JOHN G. CATE.

February 2, 1904.

Since Nov. 12th., there have been reported eight cases of diphtheria, two of scarlet fever and one fatal case of typhoid fever.

Wolfeboro, N. H., Feb. 26, 1904.

Report of Water Commissioners.

Wolfeboro, N. H., March 3, 1904.

TO THE BOARD OF SELECTMEN:

We herewith submit report of Water Commissioner's to your Honorable Board for a period of eleven months from April 1st., 1903 to March 1st., 1904. During this time our aim has been entirely directed to improving the service already installed.

The purity of our water supply is highly satisfactory and its source uncontaminated to an exceptional degree, conditions which would be equalled by very few other towns.

The method of the fixed charges per outlet is as equitable as possible under the circumstances, but there will always be occasions arising for dissatisfaction until the Meter System is introduced, which we believe would cause a great saving in water, and be satisfactory alike to consumers and the town supplying the water.

Numerous repairs have been made in service pipes, and about 300 feet of new 2" pipe layed on the side street branching from Center Street near Herbert Horn's in Wolfeboro Falls, this taking the place of 3-4" pipe which was insufficient for use required.

Several requests have been made for the extension of water mains, and subscribers enough guaranteed in nearly all of these cases to warrant the requests being granted. One of these desired extensions is on Sewell Street from a point opposite Mrs. Seymour's cottage, the end of the present service, to continue along said street to a point opposite the summer home of Elbridge Young, the service pipe now supplying the residents of this street with water is but 2" in diameter, and if this extension be made this pipe should be replaced by a 4" pipe and hydrants put in for fire protection of homes along this thoroughfare.

Below we give data of Water Commissioners' Receipts and expenditures for the period of our administration:—

There is now on deposit in the Rochester National Bank to the credit of the Water Works the sum of \$1,165 90.

There are 435 takers of water.

Doubtless this record will be pleasing to our tax payers, but we would caution them not to expect that it will be equalled in the coming year as we have been spared expensive repairs, and new work has been almost entirely excluded. Our hope has been that a surplus might be left out of which a sinking fund might be

created for the relaying of the intake from Beach Pond which must soon been done.
